FORUM Solutions and Vysym Team to Co-Market TAPS® Enterprise Lending and TALIS™ Voice Gateway Software

Effort allows both companies to recommend total software solutions

Indianapolis, IN & Irvine, CA – FORUM Solutions, Inc. and Vysym Corporation announced today a marketing alliance which will promote the integration of their newest loan origination and speech recognition lending software solutions.

FORUM Solutions is the developer of the TAPS® (Total Account Processing System) line of web-based consumer loan origination software solutions, including the newest loan origination version, TAPS® Enterprise Lending. Vysym's telephone-based TALIS™ (Telephone Application Loan Information Systems) product line, based upon speech recognition with touchtone support, accepts any type of loan application, provides complete loan product information, allows instant credit analysis, and provides voice marketing/communications features.

Previously, the companies had announced an agreement to interface their product offerings for sale to credit unions and other financial institutions. Now, the companies will co-market the alliance through joint training for their respective sales forces and combined marketing ventures, such as trade show appearances.

"We're excited because this co-marketing agreement allows our partnership with Vysym to move beyond the product integration stage to being able to proactively recommend a state-of-the-art total software solution to current and prospective clients," said Douglas True, president of FORUM Solutions.

Phyllis Meissel, president of Vysym, shares True's enthusiasm for the new co-marketing agreement. "Vysym and FORUM Solutions have a positive business relationship with open lines of communication that allow both companies to stay up-to-date with new product enhancements and core capabilities. This enables us to feel confident that the product is a good fit for a particular client's needs when recommending each other's software."

FORUM Solutions is a wholly owned subsidiary of FORUM Credit Union (\$875 M, 84,000 members) and provides a suite of software products to financial institutions across the country. Launched in 2000, FORUM Solutions offers consumer loan origination and Internet banking software tailored to promote automated processes and improved service delivery. Written using .NET and XML technologies, and utilizing a Universal Integration Platform, TAPS® Enterprise Lending supports cross selling, income generation, and increased staff and end-user satisfaction.
